Renato Ribeiro

Senior Software Engineer, 28.
São Paulo, Brazil.

https://rena.to - hi@rena.to - +55 11 960762016

Born and raised in São Paulo, Brazil.
Since very young involved with computing, I started playing alone with programming when I was twelve with the incentive of my creative and curious mind. Currently engaged with the React community and its technologies.

Experiences

12+ years of experience with Web Development (HTML/CSS/JS).
8+ years of experience with React ecosystem.
8+ years of experience with TypeScript and Node.js.

Skills

I have many skills that I have developed during these years of experience in the professional market. Today, though, my focus is on JS ecossystem: **React**, **Next.js**, **GraphQL**, **TypeScript**, **Node**, also **PostgreSQL** and **Drizzle**.

Open Source

I consider Open Source very important because I can give back to the community everything I already consume from it.
In addition, I consider it the best way to acquire knowledge in a self-taught way (e.g. studying other people's code and receiving third-party adjustments in repos), as well as practicing social and collaborative skills (e.g. receive code review from people you do not even know, plus the dialogue involved).

I'm creator and maintainer:

- React PowerPlug - 1.4 million downloads
- React Sizes - 1.3 million downloads
- github-blog

I contributed:

- Docz
- Ariakit
- Emotion
